🌐 Fairtrade urges EU member states to vote YES for **#CSDDD**, to secure a clear legal framework that guides companies' **#hredd** efforts. In 2022, over 270 Fairtrade certified farmer organizations, supported by 40+ companies, outlined the essential elements for effective due diligence directive.

This collaboration showcased a collective commitment to shared goals, emphasizing that respecting human rights and environmental sustainability is a joint responsibility where every stakeholder must contribute.

The HREDD's strength lies in its risk-based approach, allowing prioritization and flexibility across different value chain actors. Importantly, it doesn't demand perfection from the start. With proper support, even SMEs can successfully implement it!

But where do we stand on the joint call from both farmers and companies for fair purchasing practices that enable living incomes and wages, responsible disengagement as a last resort, and meaningful stakeholder engagement as indispensable components of fair due diligence?

These crucial elements are all incorporated in the **#csddd**, currently at risk. Let's not lose another year, two, or more. Vote YES for the **#CSDDD** and uphold the values of living income, fair purchasing practices, and sharing of costs of compliance with businesses.
